

**FOR IMMEDIATE RELEASE:**

### **One-of-a-kind Training Event at IDLS 2011**

NCS is pleased to announce a one-of-a-kind training opportunity being offered at the International Data Link Symposium in Boston, Massachusetts 27 September 2011. NCS, in cooperation with Thales UK and Diginext, will present "A Day in the Life of a Data Link Management Cell (DLMC)". This one-day training event will familiarize students with the complexities of planning, designing, and managing Link 16 and multi-TDL networks. The course will walk the students through a complex scenario utilizing the actual systems used in DLMCs throughout the world. The training will cover each of the following phases to include the creation of the actual products required for real-world operations:

- Initial Planning Phase
  - Information Exchange Requirements
  - Network Design Requirements Specification
  - Network Design Request
- Network Design Phase
  - Network Design
  - Network Description Document
  - INDE Files
- Pre-Mission Planning Phase
  - OPTASK Link
  - Radiation Request
- Network Management Phase
  - Frequency Clearance and Management
  - Dynamic Network Management
  - Radio Relay Control

To further enhance the training, instructors will create the required materials using the following systems:

- Multi-TDL Planning System
- OPTASK Link Generator
- INDE Processing Program
- Network Management System
- TACTX MultiLink Simulator
- Tactical Network Design Station
