

Tactical Data Link and Network Centric Training ~ Consulting ~ Software Development

Network Centric Solutions (NCS) delivers affordable, high-quality, on-site and web-based Tactical Data Link (TDL) Training to customers around the world. With dozens of TDL Training Courses in our inventory, we can deliver tailored solutions to meet any training requirement, class size, or schedule.

Tactical Data Link Training Courses

NCS offers more than 50 Tactical Data Link training courses, which can be tailored to meet any training requirement. Some of our TDL courses include:

- Introduction to Tactical Data Links
- Link 11 Executive
- Link 11 Intermediate
- Link 16 / JTIDS / MIDS Executive
- Link 16 / JTIDS / MIDS Intermediate
- Link 16 / JTIDS / MIDS Advanced
- Link 16 / JTIDS / MIDS Expert
- JTIDS / MIDS Operations
- Link 16 / JTIDS / MIDS Planning
- JTIDS / MIDS Network Design
- JTIDS / MIDS Network Management
- Multi-TDL Network Management
- Joint Range Extension Applications Protocol
- Variable Message Format
- Link 22 Executive
- Link 22 Intermediate

Link 16 Computer Based Training Course

NCS offers a complete Link 16 CBT ready for delivery today. The course is offered as an electronic training alternative to standardized instructor based training courses, enabling students to complete the course at their own pace. The course contains 22 training modules, more than 350 audio instructor files, 250+ colorful graphics, and is integrated with our new Learning Management System (LMS). The course is AICC, SCORM 1.2 / 2004 compliant, and offers online instructor support to ensure that every student question is answered (like having a Link 16 instructor on staff).

"Live" Web-Based Training

The NCS Online Training Center (OTC) offers students the opportunity to take many of our training courses from the comfort and convenience of their home or office; saving time, effort, and money. What's more, the OTC uses live, two-way video and VoIP as well as our TDL Training Chat Room, maintaining the same student-to-instructor interaction experienced in the classroom. The OTC delivers a media-rich, engaging classroom experience over a web browser; ensuring participants experience high-quality, interactive, online instruction.

Tactical Data Link Training Experts

Multi-TDL Planning System (MTPS)

MTPS is the most advanced multi-link planning tool available. MTPS uses COTS technology to deliver a platform-independent, open-architecture system that is affordable, user-friendly, and operator-intuitive.

Key Features

- 100% ADatP-3 v13.1 OTL Compliance
- Capabilities and Limitations Database
- TDL Planning Checklist / Status Indicator
- IER Planning Database
- Participants Database
- Address Processor
- Geographic Planning Tool
- Network Design Request Tool
- Radiation Restrictions support
- JTIDS / MIDS Radiation Request
- TSDF Calculator
- Online / Offline Plan Creation
- Collaborative TDL Planning Capability
- Networked TDL Architecture Monitor
- Automatic OPTASK Link Generation
- ATO / ACO Support
- MTPS Chat Capability
- Enhanced Synchronization Processor

NATO Interface Control Officer Certification Program

The NATO Interface Control Officer (NICO) Program addresses the need for a formalized Expert-Level Training Program for personnel within NATO. The NICO Program trains students to a very-high skill-level, tailored specifically to meet the unique requirements of NATO Nations. Further, the NICO training program has implemented the latest active training techniques, designed to increase comprehension, retention, and competence. Training sessions are a mixture of the following:

- Academic training sessions
- Hands-on training sessions
- Team exercises
- Team briefings
- Student products (e.g. OPTASK Link)
- Daily testing
- Practical evaluations

Consulting (On-Site / Web-Based)

NCS offers Tactical Data Link and Network Centric related consulting services (on-site and web-based) to clients around the world. Our web-based customers receive the same level of service and expertise as our on-site customers without the time and cost associated with travel. Customers are connected via our high-speed, secure, web-based application with two-way video and VoIP. Areas of expertise include:

- C4I System Acquisition / Integration / Management / Testing
- Requirements Specification / Management
- Human-to-Machine Interface design
- Applications / Software design
- Concepts of Operations development
